

Addendum to the AUC Academic Standards and Procedures 2023-2024

Following a review of the mathematics entry requirements for Dutch applicants in 2023, which recommended changing these requirements, the AUC Management Team decided to seek an addendum to the adopted Academic Standards and Procedures (AS&P) for 2023-2024. As the proposed change to the mathematics entry requirements for Dutch VWO applicants could positively impact such prospective students, Articles 8.5 and 8.6 of the AS&P were invoked, which state that amendments of the AS&P require approval from the Student Council and Board of Studies and can only be implemented in the ongoing year if they do not negatively impact students.

The following change was approved by the AUC Student Council on 16 August 2023 and by the AUC Board of Studies on 2 October 2023. The Addendum was adopted by the AUC Board (the Dean of the UvA Science Faculty and the Dean of the VU Science Faculty) on 3 November 2023.

Where indicated, this Addendum replaces the provisions of the AUC AS&P 2023-2024 as adopted on 12 July 2023. In case of conflict with the AS&P, the addendum will apply.

AUC AS&P

Mathematics requirements in Appendix 4

Mathematics requirements:

Intended major Sciences

- Average grade 7 or higher in VWO maths level B (wiskunde B), or equivalent.

Intended major Social Sciences

- Average grade 7 or higher in VWO maths level A (wiskunde A), or equivalent.

Intended major Humanities

- Average grade 7 or higher in VWO maths level C (wiskunde C), or equivalent.
